

Preface by the editors

ICAM'2018 is the result of fruitful cooperation between many professors in Laboratory of Engineering Systems and Applications (LISA) at ENSA, Fez and Laboratory of Engineering Sciences (LSI) at FP, Taza. The **ICAM'2018** conference is held at University Sidi Mohamed Ben Abdallah, National School of Applied Sciences, Fez (ENSAF), Morocco.

This conference is an opportunity for researchers to present their latest works on the following topics:

- Partial Differential Equations
- Non linear Analysis
- Control Theory
- Dynamical Systems
- Numerical Analysis and Scientific Computing
- Algebra, Number theory and Cryptography
- Coding Theory, Computer vision and Automatic.

The conference received a lot of papers, the quality of submissions was very high, and the selection process was challenging. First and foremost we would like to thank all authors for their submissions and Scientific Committee members for their efforts in reviewing the papers. Finally, our thanks go to all the members of the organizing Committee: being part of this team is actually a privilege and a valuable experience.

The following papers were submitted by the participants in the conference, then refereed and accepted for publication in a special issue of the Gulf Journal of Mathematics (**GJoM**).

We greatly appreciate the efforts of the contributors and referees and thank the editorial staff of Gulf Journal of Mathematics, especially Prof. **FIRUZ KAMALOV** for his patience and assistance with this volume.

Table of Contents

Prime ideal factorization and p-integral basis of quintic number fields defined by $X^5 + aX + b$ L. EL FADIL	1-13
Entropy solutions for a nonlinear unilateral $p(x)$ parabolic problems with $f - \text{div}F$ data M. MEKKOUR	14-36
A digital signature scheme based simultaneously on the DSA and RSA protocols L. ZAHHAFI and O. KHADIR	37-43
A blind signature based on the DLP and RSA cryptosystem S. EZZIRI and O. KHADIR	44-50
Some results involving automorphisms in prime rings A. Y. ABDELWANIS and A. BOUA	51-55
Existence solutions for a class of nonlinear parabolic equations with variable exponents and L^1 data C. YAZOUGH	56-71
ECC over the ring by using a password $\mathbb{F}_{2^d}[X]/(X^2)$ A. TADMORI, A. CHILLALI and M. ZIANE	72-78
Nonlinear elliptic equations with measure data in Musielak-Orlicz spaces A. ABERQI, J. BENNOUNA and M. ELMASSOUDI	79-100
Renormalized solution of nonlinear parabolic equations without sign condition and general measure data A. MARAH, A. BOUAJAJA and H. REDWANE	101-132
Solvability of nonlinear anisotropic elliptic unilateral problems with variable exponent Y. AKDIM and A. SALMANI	133-150
Existence of renormalised solutions for nonlinear elliptic problems in weighted variable -exponent space with L^1-data Y. AKDIM, C. ALLALOU and N. EL GORCH	151-165
Under totally geodetic variety of $\text{Geod}\mathbb{C} P^n$ A. CHILLALI	166-169
Existence of a renormalized solution for some nonlinear anisotropic elliptic problems Y. AKDIM, M. ELANSARI and S. LALAOUI	170-181
